

INDUSTRIAL OFFSET PRINTING · LARISSA, GREECE · SINCE 1978

Right the first time. Every time.

Company profile and product catalogue — printed
packaging components, food-contact print and
commercial print for demanding sectors.

TERZIDIS PRINT IKE

Farsalon 166, 413 35 Larissa, Greece

2026 edition

terzidis.gr

An industrial offset printer, built on control.

Terzidis Print has been in continuous print production in Larissa since 1978.

Today we operate from our own 1,000 m² facility with a four-colour Heidelberg Speedmaster with inline coating, computer-to-plate prepress and our own order-control system — serving customers throughout Greece and the European Union.

1978

Continuous print production in Larissa

ISO 9001

Certified quality management, since 2003 · current standard ISO 9001:2015

72 × 102 cm

Maximum sheet size, four-colour with inline coating

40–400 g/m²

From lightweight papers to heavy board

100% in-house

Printing, finishing and converting on a single site

Greece & EU

Organised distribution through partner freight carriers

Control before printing

Every order is verified before it reaches the press: file version, artwork, quantity and paper are checked against the specification, and production starts only after approval of an electronic proof. Our procedures are fully documented and recorded electronically.

Transparency after printing

Customers follow their order online — production stage, files and order details — through our customer platform. Each delivery is accompanied by a certificate of conformity, and retained samples are kept for every production run.

Three production sectors, one standard of quality.

High-specification print

01

Printed matter for sectors where content is controlled and every version is documented. Small text printed with high definition on lightweight papers.

Inserts & leaflets

Lightweight papers from 40 g/m², version verification before every run.

Package inserts

Dimensions and delivery format to the specification of the packaging line.

Technical documents

Dense text, tables and drawings, consistent in every reprint.

Food packaging

02

Printed paper and board for food packaging, produced for third parties and as our own products — exclusively with inks and coatings suitable for food packaging.

Packaging paper & board

Printed sheets for further converting, with True-Up™ colour control in gang runs.

Folding cartons

Board up to 400 g/m², with inline coating to protect the print.

Placemats & serving papers

Long runs with consistent colour, suitable for food service.

Commercial print

03

Promotional and corporate print in medium and long runs, with faithful reproduction of corporate colours.

Catalogues, magazines & books

Multi-page work with uniform colour and in-house binding.

Brochures, leaflets & flyers

Two-, three- and multi-panel formats, folded in-house.

Folders & stationery

Heavy boards with die-cutting; letterheads true to brand.

Choose what you need. We take care of the rest.

Printing	Sheetfed offset, four-colour (CMYK) and Pantone spot colours, with inline coating. Maximum sheet 72 × 102 cm.
Coated papers	Silk (velvet) and gloss art papers, 90–350 g/m ² .
Uncoated papers	Offset and writing papers, from lightweight grades up to 120 g/m ² .
Boards	Premium boards 200–350 g/m ² , and folding-carton board up to 400 g/m ² .
Common formats	Flyers A5, A4, 25 × 35 cm · Placemats A3, 25 × 35, 35 × 50 cm and larger on request · Any custom format within the sheet size.
Finishing	Inline coating · Folding · Saddle-stitched, perfect and thread-sewn binding · Die-cutting and creasing · Hot foil stamping · Embossing · Sheet lamination.
Proofing	Electronic proof approval before every run; physical colour proof available on request.
Minimum quantities	Flyers, placemats, letterheads: 5,000 pcs · Catalogues, books, magazines, folders and other print: 1,000 pcs.
Lead time	Typically 3–5 working days from order confirmation; additional finishing may extend this.
Delivery	Throughout Greece and the European Union via partner freight carriers.

Food-grade inks & coatings

European raw materials

Lot traceability

Certificate of conformity

Online order tracking

Documented at every stage.

Our quality system is designed for customers who audit their suppliers. We welcome customer audits and keep complete records for every order.

ISO 9001:2015

Certified quality management since 2003, with all procedures recorded electronically.

Food-grade only

Exclusively inks and coatings suitable for food packaging, across all production.

Full traceability

European raw materials, with lot traceability for every paper and ink used.

Certificate of conformity

Issued with every order, confirming the agreed specification.

Retained samples

Reference samples kept from every production run for long-term verification.

EU regulatory awareness

Processes aligned with the EU packaging (PPWR) and deforestation (EUDR) frameworks.

TERZIDIS PRINT INNOVATION

True-Up™

Our own method for gang-run printing: multiple designs on one sheet, each with faithful colour. Less make-ready, less waste and lower cost per design — with no compromise on colour fidelity.

HOW TO ORDER

From your file to the finished product.

1

Specification

Send quantity, size, paper and finishing.

2

Quotation

A documented quotation based on full specifications.

3

Files & check

Print-ready PDF, checked before production.

4

Approval

Production starts after electronic proof approval.

5

Delivery

Finished in-house, delivered across Greece and the EU.

Print-ready files can be sent by e-mail; larger files via a file-transfer link. Our file preparation guidelines are available at terzidis.gr. We do not undertake artwork design.

WHAT TO INCLUDE IN YOUR REQUEST

- Product type and intended use
- Quantity, or several quantities to compare
- Finished size and, for folded work, flat size
- Number of pages and binding method
- Paper or board, if already specified
- Colours: CMYK, Pantone or both
- Coating and special finishes
- Delivery address and required date

Send us your job specification.
